Source: Android Central We compare some of our favorite strategy games on Android for deep thinkers out there. This is more than just a simple puzzle game – this requires careful planning and thought to emerge with victory. You'll find some great toy value in a game like this too because the same strategy won't always work twice. Strategy players, pop on your thought caps and be able to download these excellent Android games. And if you're looking for our favorite games in other genres, we also have them. Running the whole country is difficult, but it helps when you're a dictator and can run everything as you like. This is Tropico briefly, a game in which you step into the role of El Presidente of your own Caribbean island paradise and lead your country and its people into a glorious future. You are responsible for managing all aspects of life and society on the island, building new roads and structures, training your people with schools and military bases, managing the economy by building farms and industries while setting workers' wages and working on export deals with other countries. That has not yet managed the island's politics, keeping people happy by improving the quality of life and quelling protests before they turn into a full uprising. There are many strategies involved here, because you need to make sure that the structure you build is the right staff, which may require building better schools or bringing in specialized foreign workers. You'll also get regular updates from your advisers on issues that occur around the island that often require you to choose between a beneficial approach or a harder response to show who's responsible. The scope of the game is really warm, which is why you will want to start with a tutorial that guides you through menu navigation and how to control a floating camera with touchscreen controls. Camera control, in particular, takes a bit of time getting used to, but everything is presented pretty deliberately for mobile devices so you have to get a solid forgiveness of everything by the end of your first campaign. There are 15 campaign islands to complete, but there is also a sandbox mode that only allows you to keep and rule your country however you see fit. This premium title does not include in-app purchases or ads and is a very nice title for fans of construction simulators. As president of tropical el nation growing with a lot of natural resources, it's up to you whether to lead your people with compassion and justice or with Cruel Iron. Scary and challenging is more robust than most mobile strategy games, and best of all, it is free downloads without ads or in-app purchases. There is a lot of logistical thinking needed to find success in Mindustry. Not only do you have to worry yourself with mining resources to build your defenses, but you also have to maintain and protect your supply lines - a conveyor belt that delivers your mining resources from the drill to your core foundation and defensive turret. The learning curve is quite steep when you are just starting out, but once you get a handle on the basics and start opening new technologies in the tech tree, Mindustry begins to open up. Solo mode is a great place to start and practice your own strategy, but just scratch the surface of everything industry has to offer. There are multiplayer modes available for custom servers or playing locally over LAN with the host being able to refine settings to change almost every aspect of the game. Holedown is a game of mixed fragmented puzzles in healthy strategy doses. The game has you mining to the core of celestial bodies - starting with an asteroid and working your way into the Sun - using a ricochet bounce miner ball from coloured blocks. Each brick has a number represents the number of hits needed to destroy it. You can let gravity do most of the work by destroying blocks that support other blocks and some are brave in place and must be destroyed. It's easy to pick up and play this game, but that's when the strategy comes in. All curve bricks, allow you to set up inundated bank shots to clean large parts of the block in one go. This will be quite important as the screen moves up one line after each shot. If the block reaches the top of the screen, it plays. Along the way, you'll collect the spent crystals to upgrade that gives you more balls per shot, and more shots per round. This increase is important to equip planets later but also let earlier levels become more disruptive without mind for your subway journey. If you're a fan of physics-based puzzle games and looking for new obsessions, Holedown is worth your money! Holedown is a clever take on the ball and brick genre where you roll the ball to dig into the core of the asteroid, planet, and star. It offers simple games while delivering endless challenge modes. Each of the nine heroes has unique special capabilities as well as collectable and collectable card groups. Casual online games, match rankings, wacky weekly brawls tavern, and grueling grueling The game appeals to a wide range of commitments, as you build your deck and your best strategy. Hearthstone without a doubt the king of free card games on Android. It's long enough to have a ton of content for newer players to discover, although there are plenty of in-app purchases to unlock the expansion of new cards. Hearthstone is one of the largest digital card games you can play on Android. Based on the Warcraft universe, this is a wild game popular with a ton of expansion available for in-game purchases. If you play Witcher 3: Wild Hunt, then you should have been at least quite familiar with Gwent. The game started out as a mini-game in Witcher and kind of blew from there. Featuring amazing card art, it has simple premises like many of these card games. For many of us, it adds a few more hours to an already huge game. The Red Project CD developer broke Gwent out into his own spinoff, complete with better card art and expanded deck. And then, after a while, they took him to Android and my boy was excited. It's a big download, but I think it's worth it. I don't usually fan card games like Hearthstone, but I really enjoy Gwent. As a free, it contains microtransactions, but like other games that do well, I've gone through a lot of Gwent hours on my phone without spending a cent. If you enjoy the world of The Witcher, whether you've read the books, played games, or watched the Netflix show, then you'll find something like in Gwent. Ride into a great card game that starts out as a fraction of something far bigger. If you like The Witcher, then Gwent is a card game for you. Comparing our card games to this list is runeterra legend, Riot Game of Answers to Hearthstone. Featuring heroes from the League of Legends of the universe. Legendary Runeterra works similarly to Hearthstone and Gwent. It doesn't mean revolutionary, but people who want to escape the Warcraft universe into another fantasy realm should consider this one. I'll be honest, I've never played League of Legends (LoL). It never appealed to me, so I didn't know what was going on when I launched Runeterra. Even so, the tutorial is thorough enough for you to feel like you have a grip on how to play. Even if they're scripted events, it still feels nice when you're out of AI. Runeterra legend is also free, complete with microtransactions. The riots don't have the most lucrative reputations out there, but Legendary Runterra shows many promises as a potential Hearthstone contender. Legendary League fans have their own partner Hearthstone, complete with microtransactions and all. Star Command is a sci-fi strategy game with a retro pixel art style. The player takes a spaceship command that vaguely looks like it may have been pulled out of the Star Trek film, and recruits crew, upgrades the facility, and embarks on an odyssey between galaxies that usually end in bomba members with Foreign. Battle rage between vessels and different mini-games for each weapons system, or against boarding parties, where you need to move the crew to a position, extinguish the fire, and make sure your person is not sucked out into a cold space void when there is a body breach. Over time, your crew is increasing in skills, allowing them to human multiple ship stations with growing effectiveness. If you are looking for a fun and lightweight single player experience with great writing and a lot of long-term developments. Star Command is where it is. Star Command is a fun space strategy game that is steeped with references from your favorite sci-fi franchise. Worth the purchase for fans of the strategy game. Northern Bad is one of those unique games that comes along every time and impresses all of us. Developers describe it as a real-time factractic tactic, which suits him well. It's a challenging game, make no mistake, and even the win situation isn't all that happy. Look, you're trying to defend yourself in your island home from various Norse invaders. They will come to you quickly and cruelly, ensuring that you are kept on the edge of your seat while you struggle just to survive. All these couples are well with a cutesy art style. It's a pretty game that draws you into a false sense of security. Bad North is a premium game, meaning you pay once and you're done. It's a low cost to get in as well, and you'll get a lot of fun out of it. Go go go during and give it a shot, see if you can survive the Viking attack. Experience a fun real-time tactical faction with the Bad North. Defend your government from violent Viking invaders. Conquering the ancient world in ROM: Total War. This game has a massive turn-based battle, 19 factions to choose from, and controls optimized touchscreens. Your goal is to conquer everything, whether you're Roman, Egyptian, Macedonian, or what you have. There was more than just a win in a cruel and awesome game of war; you also need to look to your political, economic, and religious affairs of civilization. There are actually three ROMs: The amount of war games in the Play Store, so be sure to check out the Variants of Barbarian and

Alexander Invasion if you like this one. In the port by an excellent team in Feral Interactive, ROME: Total War has plenty of campaign hours, plus a lot of replayability. Conquered the ancient world as one of 19 factions, including the large Roman Empire. This is the best strategy. TD Bloons are a well-known and loved tower defense series that has been around for a while. You play A group of monkeys defend your land, use various towers and upgrade to do so. You have 21 to choose from, all of which include three upgrade routes for you to choose from. You also get playing offline, extra difficulties, and a lot of fun. You have to pay five dollars ahead and then deal with itp options to unlock a faster and/or extra, there's nothing necessary to make the game play. Whereas I will that this isn't added to the premium title, at least the game itself doesn't stop if you don't ask for more than extra money. One of the best tower defending games around, Bloons TD 6 is a fun strategy game for everyone. It's a bummer about the IAP being added, but at least they're really an option. Card Thieves are a nice hybrid between card games and strategy games. Stealth is the name of the game; you play a thief who must sneak their way through the deck of cards collecting treasure while avoiding detection. You can use equipment cards to help you with the way your thieves are too, but don't get too dirty or you'll run out of sneaky eyes and get caught. You'll do things like extinguishing torches, pickpocket controllers, and other dastardly shenanigans. Card Thieves features daily challenges and in-depth strategies, and a nice development system that allows you to upgrade the equipment cards as you attract heists. There is a bit of a steep learning curve involved here, but it's a game that rewards fans of strategy card games. Stealth fans get their own card game with Card Thieves. Each game is just a few minutes long, but there is a steep learning curve to actually dominate it. Neighbour Hello is a stealth horror puzzle/strategy game. Basically, you are a snoopy neighbor who spys on neighborhood residents. The person is said to be up to something and you're determined to find out what he's hiding in his basement. You'll break into his house over and over again, but he learns your pattern every time and set up a defense to resist you. So you have to come up with a new strategy by bypassing what he's set up. This game will run you a penny, but I think it's worth it if you want a strategy game/puzzle with horror elements. It's definitely a weird premise, I'll admit, but I think it's pretty enjoyable. It's free to install and try, but then you'll be asked to ask for more than \$15 to unlock the full experience. Think of what your neighbour is up to the puzzle of this horror strategy. Burst into his home time and time again, getting around his defense every time. Time.
